

BRENDAN GEARY

As a designer, I am a jack of all trades. I research, I engineer, and I create. My keen eye for detail takes my designs from ideas to reality; from manufacturing to installation, every step is meticulously worked through until my product comes to life. I have a passion for creating furniture and products that simply enhance the user's day-to-day.

threshold

a workstation for the home

DANISH DESIGN

According to the U.S. Bureau of Labor Statistics, the percentage of U.S. citizens working from home has increased from 18 to 23 percent in the last four years. With nearly a quarter of the nation teleworking today, it is imperative that they have a reliable place to work within their home.

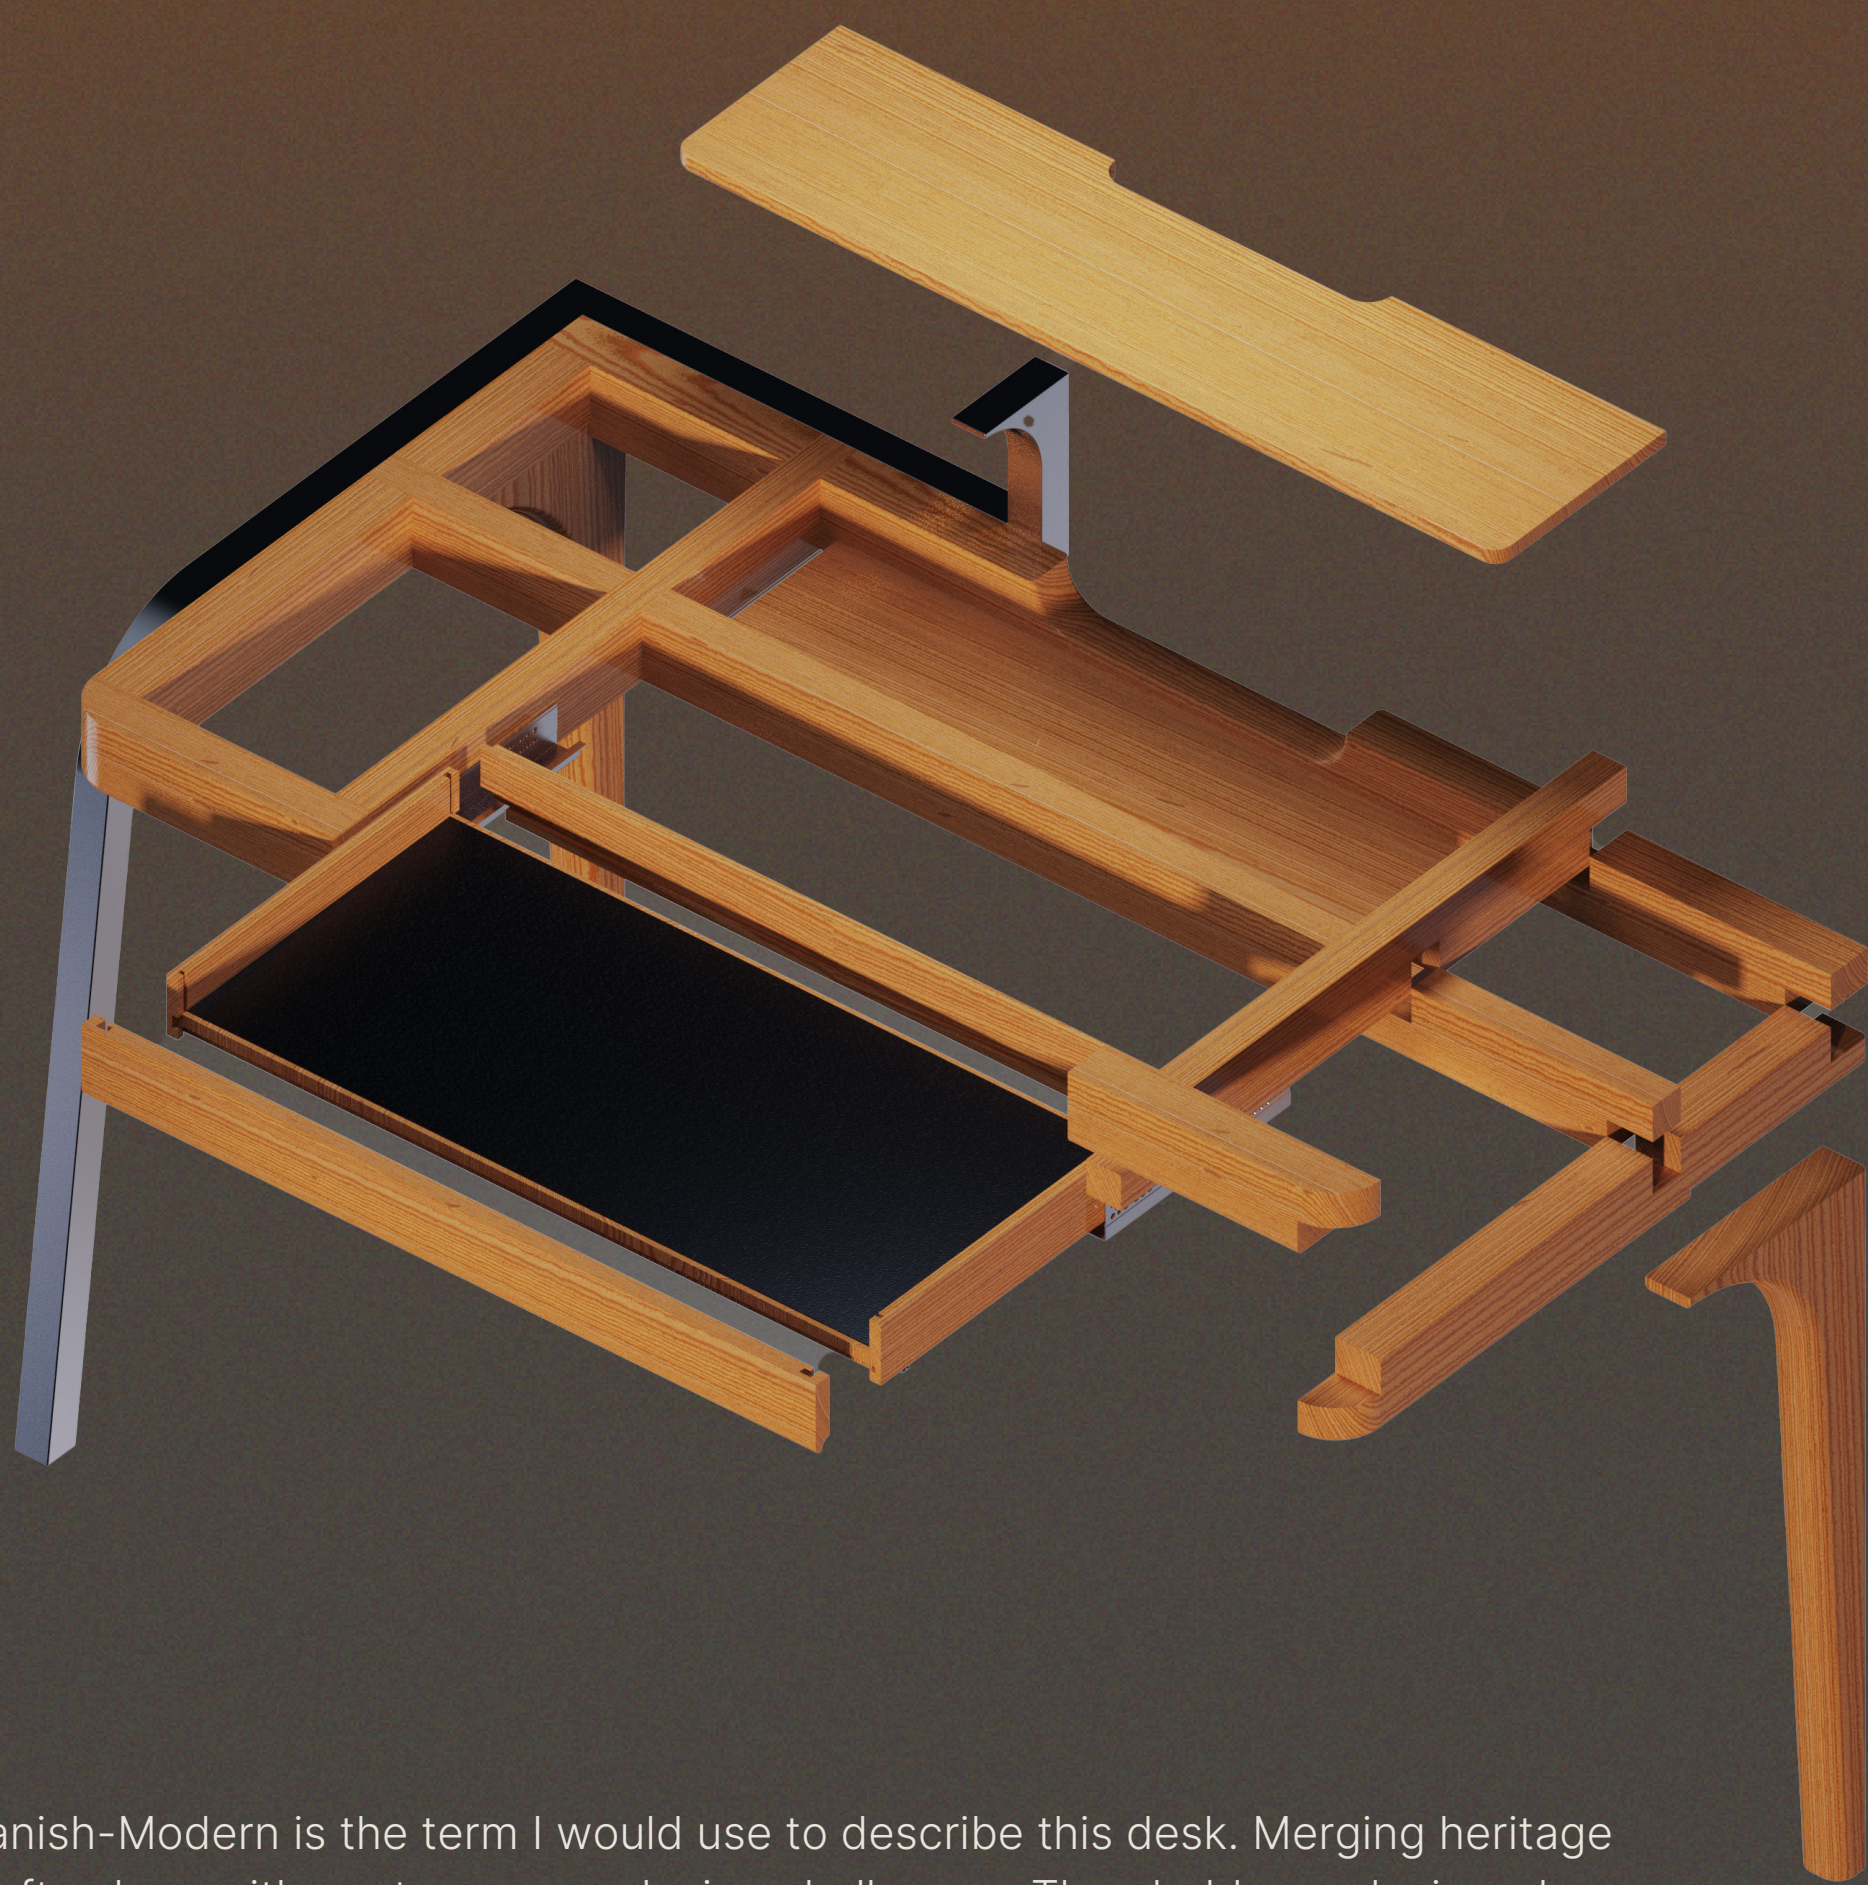

PERCENTAGE OF ADULTS WHO WORK FROM HOME

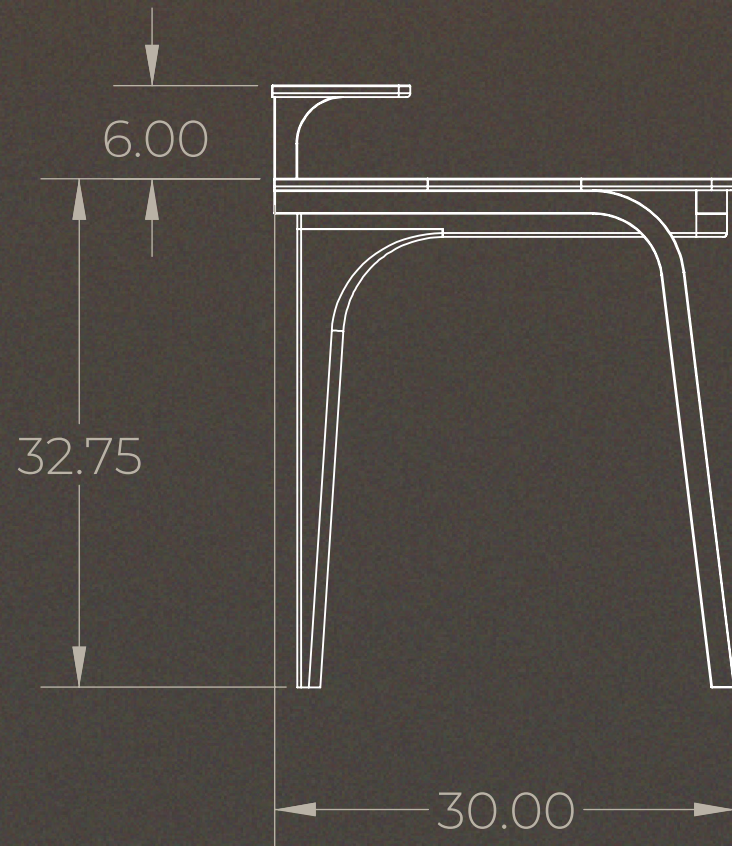

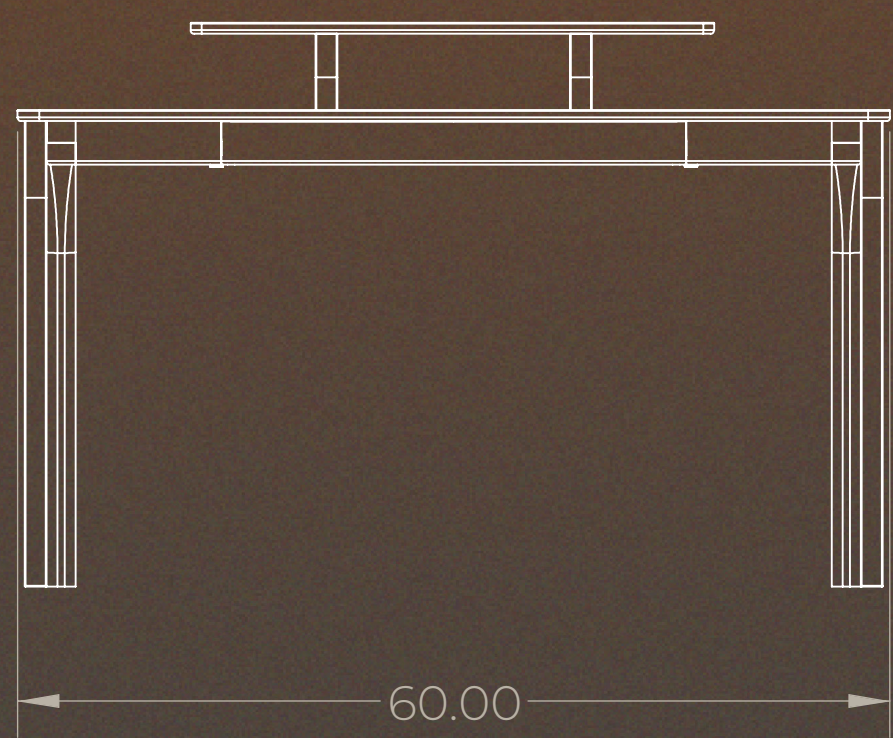

THRESHOLD

Threshold is a workstation that supports modern-day desk work by incorporating electronic-centered organizational features that support a sustainable and ergonomically friendly work-life.

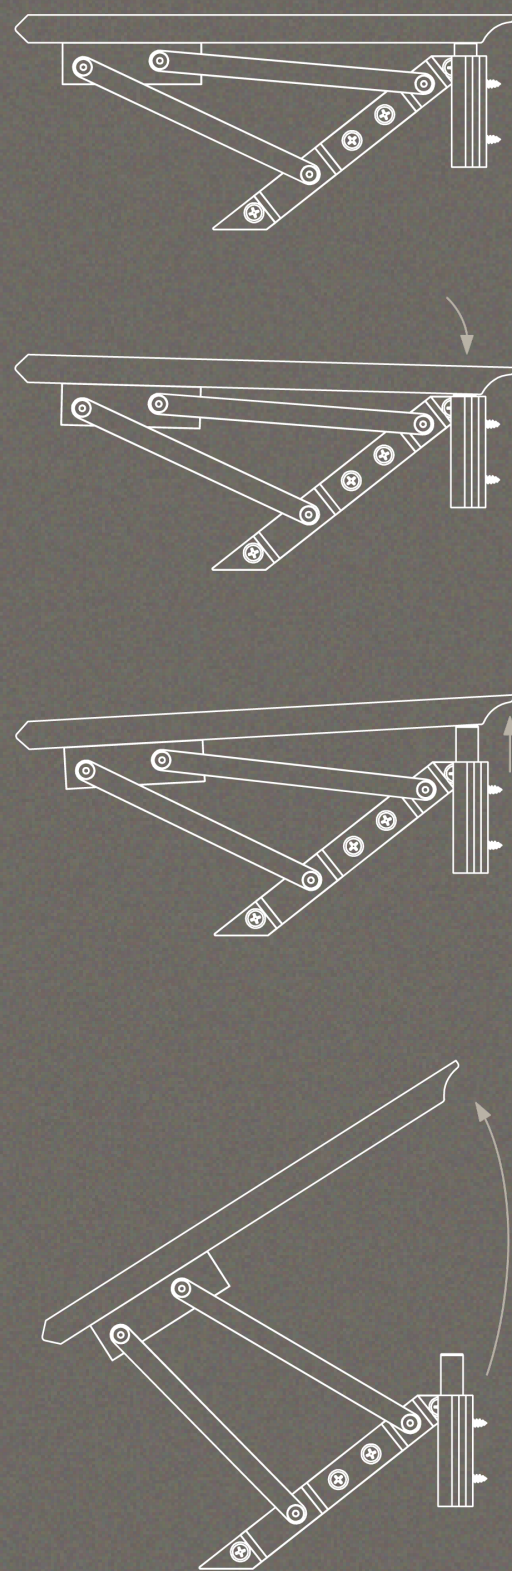

Inspired by Hygge (hyoo-guh), a Danish idea meaning comfort, this desk incorporates warm neutrals and muted tones with clean, soft edges to give off a sense of calm. Threshold captivates the user with it's warmth and encourages productivity with it's organizational abilities.

Danish-Modern is the term I would use to describe this desk. Merging heritage craft values with contemporary design challenges, Threshold was designed to function practically for modern-day work while creating a focus space that enhances the atmosphere of the home.

MODERN LIVING

FEATURES

With a generous 60"x30" desk top, 36" long monitor stand, slim front drawer and back hatch for cables and accessories, Threshold provides all the accessories to work comfortably in your home.

HATCH DESIGN

The cable management hatch, located on the rear end of the desk, has space to accommodate a multitude of chargers and cords, serving as a power hub for electronic activity. Two holes are located on the back hatch, which have been optimized for cable threading. With this feature, Threshold stays organized without the clutter of chargers scattered on the desk.

With a push of the latch-release button, the specialized four bar link hinge props open for maximum accessibility inside the hatch.
